JULES & JEREMY ART AND DESIGN

BACKGROUND.

Vision:

Jules and Jeremy like to work with simple shapes (less is more). Their aim is to find a balanced combination of simplicity and functionality. They like to play with contrast, structure and art. Looking at what the trends are is not important, but designing furniture that has a timeless look and feel is what makes a design special.

Background:

Jules and Jeremy is an joint venture between Jules Ponsioen and Jeremy Nagel. Both friends since childhood. Surrounded by creative families and friends their developed their creativity at young age. Jeremy started restoring oldtime motorcycles and making furniture for friends and family. Jules became an graphic designer and after years of making furniture and brainstorming about designing, they decided to start their own company to show their ideas of furniture design.

Media attention:

The design furniture by Jules and Jeremy has immediately been received very well by the international press. Trend watching sites and blog sites from all over the world are showing their designs (Spain, Japan, USA, Brazil, England, etc.) Also magazines from countries like The Netherlands, Australia, England and Mexico are publishing Jules and Jeremy designs.

The design duo was overwhelmed by all this attantion and is already exporting their furniture to several countries.

Una Parte dining table:

This Jules & Jeremy design table differs from the idea that tables should consist of a top and underneath the legs. With this design we made the top and the legs become one through elegant curves and graceful lines, without compromising simplicity and symmetry. This design shows contrast between straight lines and curves and contrast between the high gloss lacquer and oiled natural wood. The addition of black or white lacquered the table is 'lifted' off the floor. This model seamlessly combines with floors of the other kinds of wood.

Fifty-Fifty coffee table:

The design of the coffee table Fifty-Fifty is sleek and excels in its simplicity. This coffee table is 50% open and 50% closed. Behind the closed areas, there is room for things that are often found on a coffee table (newspapers, magazines, remote controls). They can be out entirely out of sight. If the table is turned for a fourth in sight, it feels like a different table.
